

FAMILY VOICE

Family Engagement

Family Voice creates strong, long-term relationships between schools, families, and communities. By including family, student, and community perspectives, we promote a sense of **belonging**, **shared responsibility**, and **student success**.

Why should schools participate?

- Work with school administrators, staff, students, and family members to build trust and communication with families and communities
- Understand diverse family and student needs and perspectives to improve student success

How will Family Voice benefit your school?

- Stronger family partnerships lead to better student outcomes
- Focus on student needs by aligning school goals with various family and students perspectives
- Helps school teams develop solutions to challenges
- Support teacher efforts by providing insight to family dynamics and student behavior

The Five Components of Family Voice

Customize your experience based on your district's unique needs.

Family Voice is a comprehensive process that takes time for districts to fully implement. **Every district's journey is different.** Choose the components that best fit your needs and goals.

Student Focus Group Qualitative Data Report

Facilitated conversations with students to understand their experiences and inform decisions with a data report.

Family Engagement Leadership Team

Build a team of educators and family members to guide the work and drive meaningful change.

Family Chat Qualitative Data Report

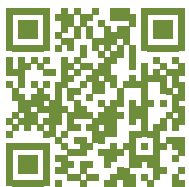

Facilitated conversations with families to gather insights and receive a detailed data report.

DISC Assessment

A training that helps to understand yourself and your colleagues, and in turn strengthens school culture.

School Wide Professional Development

Build capacity across your school through training that strengthens relationships and engagement.
