

# SCIENCE OF READING & LITERACY

## Literacy Solutions for Student Success

Our Science of Reading & Literacy professional learning supports help all districts build strong, aligned literacy systems. Through workshops, coaching, and collaborative planning, we **strengthen instruction, support effective use of data, and build educator expertise.** Whether participating in the ELA-SD grant or pursuing literacy improvement independently, districts receive practical, research-based support tailored to their local context.

Our approach to building literacy partnerships is simple and collaborative, helping schools plan and implement meaningful systems with tailored, evidence-based supports.

**Partnership  
& Needs  
Assessment**

**Customized  
Professional  
Coaching**

**Ongoing  
Implementation  
Support**

**Progress  
Monitoring  
& Reflection**
